B-20-2513	WALLER, STEPHEN G & WARD, JANE B	10/7/2020	229-108	125	BLANTYRE AVENUE, CENTERVILLE	Residential	Remodel the current wooden deck to be approximately 6" higher and 18" narrower (Increasing setback from the lake) as the current deck. The main goal is to replace the wood decking with AZEK minimal care decking, replace the wooden railing with cable railing, add a second set of steps at the west end of the deck, and reroute the current steps to the southeast corner. We will reuse the current supports, foundation and framing under the surface decking and do not anticipate additional excavation for support posts or foundation. This smaller footprint increases setback from the lake and will allow easier passage around the deck to the north and allow storage of kayaks under the deck. This plan was given approval by the Conservation Commission under our petition identified as MADEP File #SE3-5622 at the Conservation Commission hearing on April 9, 2019. We have attached our plot plan and application from that hearing.		\$12,000.00
